AT&T Fiber Upgrade Project – A026KW3 A029FP3

Dear Homeowner, we are reaching out in reference to the upcoming AT&T project scheduled for your community. The purpose of this letter is to provide information about what the community can expect during the construction process (<https://youtu.be/wo4ffn0pIII>)

- Pursuant to Florida Statute 556; please consider this notice to locate any private facilities owned or leased by the HOA/COD/Property management group (Including but not limited to street lighting, fiber, water, reclaim, and/or sewer)
- You can expect door hangers on all residences within 7 business days, to include this correspondence.
- Shortly thereafter, your community will begin to see paint and flags locating the various existing utilities.
- Once all utility owners have populated a positive response or provided other equivalent notifications that their facilities have been located; then construction should begin within 2-5 business days.
- The installation consists of installing fiber, conduit, small terminals, 30"x48" vaults, 17"x30" or 10"x15" access boxes, as well as grounding materials such as ground rods and copper wire.
- The installation process consists of a combination of hand trench, pneumatic missile (stitch boring), and horizontal directional drilling.
- Depending on the size of your community and the conditions (weather, soil types, etc.) the duration of the project can vary; on average daily production is around 1,000' of trench per day.
- There will be an inspector assigned to your project and will be available to provide support and answer questions concerning the construction process.
- Once construction is complete; surface restoration of the disturbed areas will commence. Blue Streak LLC guarantees the workmanship of the restoration. What this entails is that all sod will be placed in an alive, cut-in, and graded state. Once the sod is installed it would be beneficial for to provide additional water for the first 14 days to ensure it takes root.
- Please be mindful that vegetation and landscaping that obstructs access to the utility easement or AT&T equipment may not be replaced.
- If during construction or post construction process any resident suffers damage to their property (sewer, driveway, water line, etc.) please ask them to call our Customer Service Help Desk at 1-800-869-1615 or email Browardcustomerservice@bluestreakllc.com for a resolution. This line is staffed Monday through Friday 8:00 am to 5:00 pm; and has an after-hour's answering machine.
